

With the increase in both the pace and sophistication of attacks, the detection, prevention, and mitigation of persistent threats presents a serious challenge to today's organizations. Micro Strategies has an experienced and dedicated security practice that addresses these concerns, offering a complete set of solutions to keep you "Ahead of the Threat".

Solutions

Micro Strategies offers the industry's most robust and integrated solution portfolio, including products and services that integrate across your organization. These solutions are designed to secure data, applications, identity management, and infrastructure while providing unsurpassed intelligence and insight.

Benefits of a complete security solution:

- Consolidated and correlated disparate log and flow data from any source
- Automated compliance tasks and risk assessment
- Advanced insight into the changing threat landscape
- Detection of the latest vulnerabilities, exploits and malware
- Customized protection capabilities to block specific vulnerabilities using scan results
- Integration of existing tools and infrastructures with new forms of defense
- Evolution to a risk-aware rather than a reactive posture
- Reduced risk of data leakage

Areas of Focus:

- Security Intelligence
- Infrastructure Protection
- Data Security
- Identity and Access Management
- Application Security

Security Management of:

- Network
- Servers
- Endpoints
- Firewalls and Switches
- Data
- Applications
- Cloud
- Mobile Devices

Cross Industry:

- Financial Services
- Healthcare & Life Sciences
- Retail & Distribution
- Government
- Education
- Telecommunications
- Professional Services
- Manufacturing
- Large Enterprise
- Small Business

Services

Managed and Cloud Security

Proactive monitoring of IT assets around the clock by professionals, providing enhanced security

Data Security

More robust protection of sensitive data with a risk-balanced strategy and leading data protection technologies

Plan, Implement and Support

Planning, design, implementation and testing for your specific security and risk management needs

Risk Management and Compliance

Assessments to help determine ways to better manage risks, compliance and governance, including PCI

IT and Infrastructure Network Security

Greater identification of IT security threats and risks across your infrastructure and protection of your networks from internet threats

Application Security

Better security and optimization of your business-critical applications

Identity and Access Management

Verification of identity and help in managing and protecting your systems, applications and data from unauthorized access
