

COMPLIANT COMMUNICATIONS ARCHIVE, AUDIT & SUPERVISION

Ensuring a company can archive email communications, as well as provide supervision on shared content is tough. Factor in cloud-based collaboration tools and compliance can seem impossible. To properly manage documents, mitigate risk and comply with legal and regulatory requirements, many businesses implement Global Relay. Using Global Relay, you can meet the strict archiving and surveillance requirements of your industry and be prepared for any possible audits or litigation.

COLLABORATE WHILE MEETING SURVEILLANCE & EDISCOVERY REQUIREMENTS

Micro Strategies has developed a solution that allows companies to take advantage of the industry-leading collaboration capabilities of Box and the surveillance and eDiscovery capabilities of Global Relay. The solution allows employees to collaborate while still complying with legal and regulatory requirements and ensuring auditability when eDiscovery is required.

Users can share documents with internal or external parties using Box. The Micro Strategies solution automatically provides that content to Global Relay. This information includes the content, the custodians involved and the audit trail for the content. Global Relay is configured for a new content stream that is Box content. Content shared using Box still undergoes the required surveillance and eDiscovery through Global Relay.

INTEGRATION

Integration of Box and Global Relay

COLLABORATION

Secure, compliant sharing that takes full advantage of Box capabilities

SURVEILLANCE & EDISCOVERY

Monitor and review data to enforce policies across all types of communications

BENEFITS

- > Mitigate risk while ensuring your business is always litigation ready
- > Satisfy strict archiving and surveillance requirements
- > Collaborate, internally and externally, while ensuring auditability if eDiscovery is required

24/7 SUPPORT FOR YOUR ORGANIZATION

Our experts don't just recommend and implement solutions – they can manage them too. We can provide 24/7 support to ensure your technology runs optimally so your employees stay focused on delivering business value.

Proactive monitoring, alerting and remediation for core infrastructure and network applications

Pre-determined escalation and remediation process

Simplified reporting and alerting

BENEFITS

- > Focus – Micro Strategies' staff focuses on managing your IT, allowing your staff to focus on more strategic objectives and your company to focus on its core business
- > Lower cost of ownership – Leverage our staff's expertise while only paying a recurring flat fee instead of paying for full-time support staff
- > Scalability - Resources can be brought on as needed, without the need to go through the hiring process
- > Flexibility – Services can be customized as needed with support levels being quickly scaled up or down as needed

WHY MICRO STRATEGIES?

Micro Strategies brings together the right mix of solutions and resources to address your unique challenges and help you use your data to drive results. From application development and DevOps to security and core infrastructure, our experts are able to design, develop, implement and operate solutions that drive business value. Beyond their technical expertise, our highly-skilled, certified team of professionals has hands-on experience as customers – giving them a unique perspective on the solutions that they design and implement for our clients.
