

DATA MANAGEMENT

Your organization's data landscape is highly complex – and most likely growing more complicated as more data sources and raw information become available. Your ability to gain fast and reliable insights from your data becomes a greater challenge every day. The inability to coordinate, integrate and access the data keeps you from achieving competitive advantage and inhibits your company's ability to grow.

BUILDING THE FOUNDATION FOR BETTER INFORMED DECISIONS

Our approach to data management combines deep experience in this area with a portfolio of solutions suited for the complex data challenges faced by organizations like yours. With the integration of advanced technologies and services, we offer capabilities that optimize results by allowing you to quickly and effectively enable the right data, while leveraging both on premise and cloud options.

QUICK START WORKSHOPS

Identify data management needs based on users, data types and desired capabilities

ARCHITECTURAL APPROACH

Combine appropriate technology components to deliver your organization's specific data needs

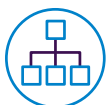

EXPERT DOMAIN SERVICE OFFERINGS

Leverage our deep understanding of architecture, integration and transformation to achieve your data management goals

DATA TRANSPORT PACKAGES

Expedite proof of concept and technology validation through the use of our pre-built replication and transformation approaches

FRAMEWORK

Standardized model development, deployment and integration into your business processes

BENEFITS

- > Increased speed to market
- > Design approach accommodates broad scale of data, workloads as well as end user needs
- > Solutions support modern data and application requirements
- > Structured and non-structured data is integrated
- > Self-service data analysis
- > Move from historical reporting to predictive analytics

24/7 SUPPORT FOR YOUR ORGANIZATION

Our experts don't just recommend and implement solutions – they can manage them too. We can provide 24/7 support to ensure your technology runs optimally so your employees stay focused on delivering business value.

Proactive monitoring, alerting and remediation for core infrastructure and network applications

Pre-determined escalation and remediation process

Simplified reporting and alerting

BENEFITS

- > Focus – Micro Strategies' staff focuses on managing your IT, allowing your staff to focus on more strategic objectives and your company to focus on its core business
- > Lower cost of ownership – Leverage our staff's expertise while only paying a recurring flat fee instead of paying for full-time support staff
- > Scalability - Resources can be brought on as needed, without the need to go through the hiring process
- > Flexibility – Services can be customized as needed with support levels being quickly scaled up or down as needed

WHY MICRO STRATEGIES?

Micro Strategies brings together the right mix of solutions and resources to address your unique challenges and help you use your data to drive results. From application development and DevOps to security and core infrastructure, our experts are able to design, develop, implement and operate solutions that drive business value. Beyond their technical expertise, our highly-skilled, certified team of professionals has hands-on experience as customers – giving them a unique perspective on the solutions that they design and implement for our clients.
