

# ENDPOINT PROTECTION & MANAGEMENT

Securing your endpoints can be challenging. Security threats are growing in complexity. The number of devices deployed on the enterprise network is growing rapidly as the modern workforce becomes increasingly mobile. The enterprise security perimeter has become more fluid causing it to become difficult for organizations to respond to evolving risks and leaving them vulnerable.

## REAL-TIME VISIBILITY & PROTECTION ACROSS ALL ENDPOINTS

Our solution provides a holistic view of all connected devices, ensuring real-time awareness and simplified management of your endpoints. It includes real-time hardware and software inventories, patch status and compliance standards that enhance your organization's overall security posture.

### COMPREHENSIVE DETECTION

Monitor and secure endpoints on- and off-network

### STREAMLINED APPROACH

Manage endpoints and deploy patches across the enterprise from a single console

### AUDIT & INVENTORY

Discover, track and report on system and software details including licensing, compliance and usage

### SIMPLIFIED & SCALABLE DEPLOYMENT

Single infrastructure approach that scales to address any number of endpoints

### ROBUST PATCH MANAGEMENT

Reduce vulnerability and risk through automated software patching

## BENEFITS

- > Decrease risk by securing endpoints
- > Improve compliance and business resilience
- > Reduce management costs associated with endpoint management

## PROTECTING YOUR ORGANIZATION 24/7

As a result of the complexity and effort required to manage endpoints, many organizations struggle with effectively managing their environment. Compounding this challenge can be a lack of internal resources or available skills; ultimately leading to an increased threat landscape. For organizations facing these challenges, Micro Strategies can help.

Our endpoint security managed services are designed to work within your existing business practices. Leverage our extensive experience to obtain the guidance and support required to manage your endpoints. Our team of certified security professionals become an extension of your staff, allowing you to focus your resources on driving business initiatives instead of required risk and compliance tasks.

### 24/7 REMOTE MONITORING & MANAGEMENT

Centralized, focused and continuous endpoint security management and monitoring by certified security professionals on a 24/7 basis

### EXPERT GUIDANCE

Certified security professionals that oversee the deployment, management and monitoring of endpoint security solutions

### MULTI-LAYERED APPROACH

Scanning, assessing, patching, threat intelligence, anti-virus, and malware protection

### REMEDiation

Assessing the criticality of the vulnerability or threat and formulating the appropriate response

## BENEFITS

- > Reduced risk by being compliant
- > Cost-effective and reliable approach to endpoint management
- > Increased staff productivity by freeing up resources to drive business initiatives

## WHY MICRO STRATEGIES?

Micro Strategies brings together the right mix of solutions and resources to address your unique challenges and help you use your data to drive results. From application development and DevOps to security and core infrastructure, our experts are able to design, develop, implement and operate solutions that drive business value. Beyond their technical expertise, our highly-skilled, certified team of professionals has hands-on experience as customers – giving them a unique perspective on the solutions that they design and implement for our clients.
