

MOBILE WORKFORCE EXPERIENCE

Businesses are increasingly under pressure to drive workforce efficiency and productivity and increase employee engagement. Traditional technology solutions often lack the power and flexibility to fit the new ways employees work and businesses operate. IT struggles to provide the distributed workforce with secure, seamless access to necessary applications anywhere, on any device.

TECHNOLOGY THAT SOLVES MOBILE WORK CHALLENGES

Micro Strategies' solutions for the mobile workforce provide flexible access and a consistent user experience independent of device or location. This offers key advantages over traditional deployments by providing a more secure environment with increased compliance and enables continual improvement and simpler patch management and remediation. With these offerings, businesses can update and deploy applications and operating systems faster and with greater consistency.

PERSISTENT WORKSPACE

Pick right back up from where you were last

ACCESSIBILITY

Access from Windows, Linux, Android and iOS (mobile or tablet)

CONSISTENT USER EXPERIENCE

Policy-based configuration provides a consistent look and feel across devices or roles

CENTRALIZED MANAGEMENT & DEPLOYMENT

Centrally manage and deploy desktop images or applications

SECURITY

Seamless patch and upgrade cycles

BENEFITS

- > Improved user flexibility
- > Enhanced endpoint security
- > Decreased cost of application and operating system refresh deployment
- > Greater visibility into the desktop environment and application use
- > Access to corporate assets from anywhere
- > Highly scalable
- > Faster refresh cycles and deployment of new applications
- > Centralized patching and remediation of desktop images and applications
