

SECURITY INCIDENT DETECTION & RESPONSE MANAGEMENT

Security solutions can be costly and complex. As such, many organizations have implemented different technologies to help identify if there has been a security incident, but have either failed to keep them current or underestimated the effort to monitor and remediate the incidents which have been identified. In addition, the tools lack the ability to easily measure the magnitude of the incident that has been identified and correlated.

DETECT, HUNT AND INVESTIGATE THREATS & INCIDENTS

Security incident detection & response management is an integration of advanced technologies to detect security events and determine which events require investigation and remediation. By combining technologies, user behavior analysis and event management, these solutions streamline and better inform incident response and remediation.

24/7 THREAT PROTECTION & MONITORING

Monitor and protect systems with a platform that harnesses your machine data to generate actionable intelligence

MITIGATE BUSINESS IMPACT

Expedite incident response operations and identify adversarial actions for containment and mitigation

DEPLOYMENT FLEXIBILITY

Deploy on premise or use managed services

DETECT ANOMALIES

Leverage artificial intelligence and machine learning to detect behavior anomalies

PREVENTION

Implement controls and technologies to avoid security incidents

COMPLIANCE

Comply with log preservation and regulatory requirements

BENEFITS

- > Strengthen cyber defenses
- > Proactively identify internal and external threats
- > Protect your environment against business disruption
- > Quickly identify and remediate cyber attacks
- > Significantly reduce time to remediation
- > Receive help from skilled resources to preserve critical digital evidence during a crisis

24/7 SUPPORT FOR YOUR ORGANIZATION

Our experts don't just recommend and implement solutions – they can manage them too. We can provide 24/7 support to ensure your technology runs optimally so your employees stay focused on delivering business value.

Proactive monitoring, alerting and remediation for core infrastructure and network applications

Pre-determined escalation and remediation process

Simplified reporting and alerting

BENEFITS

- > Focus – Micro Strategies' staff focuses on managing your IT, allowing your staff to focus on more strategic objectives and your company to focus on its core business
- > Lower cost of ownership – Leverage our staff's expertise while only paying a recurring flat fee instead of paying for full-time support staff
- > Scalability - Resources can be brought on as needed, without the need to go through the hiring process
- > Flexibility – Services can be customized as needed with support levels being quickly scaled up or down as needed

WHY MICRO STRATEGIES?

Micro Strategies brings together the right mix of solutions and resources to address your unique challenges and help you use your data to drive results. From application development and DevOps to security and core infrastructure, our experts are able to design, develop, implement and operate solutions that drive business value. Beyond their technical expertise, our highly-skilled, certified team of professionals has hands-on experience as customers – giving them a unique perspective on the solutions that they design and implement for our clients.
