

Micro Strategies Document Management for Public Defenders offers an affordable, secure and trustworthy document management solution that is specifically designed for the way Public Defenders and their staff work. Our solution enables fast, electronic access to all documents and content from anywhere, in any format, on any device, streamlining the discovery process, enhancing security, decreasing costs and reducing risk of information loss.

Benefits

- Capture all case related content including Discovery, Charging Documents & Work Product
- Access content from MS Office, Outlook or the user's web dashboard
- Ability to use mobile devices to access content ensures real-time access to case documents
- Intuitive searching through automatic assignment of properties to content, provides quick and easy access to case related content
- All content remains secure with built in security at case, folder and document level
- Integrated workflow for approval and reviews with task notifications via email
- Integrates with existing Case Management system automatically providing
 - synchronized data for searching
 - case folder creation for new cases

Business Challenge

With shrinking budgets and a higher volume of casework, State and Local Legal Organizations need to maintain a high level of defense. New requirements around content types, eCourt and electronic content from DA offices and Police departments continue to expand the volume of documents and content associated across cases and further stretch resources.
